

MAINTENANCE EXCELLENCE WORKSHOP

A two full-day interactive workshop combined with a simulation game session to learn the framework as an overall strategy and roadmap for achieving maintenance excellence

Overview

MAINTENANCE EXCELLENCE WORKSHOP

Maintenance Excellence is many things done well, its about having the right strategy, translated into optimum maintenance tasks, which are executed through efficient and effective work management processes (including materials management processes) by skilled maintenance employees delivering high quality workmanship. It also requires capturing meaningful data about the asset performance to ensure continuous improvement of the Maintenance Organisation, Tactics and Processes in order to deliver high performing, reliable assets to enable production achieves its target, and all done with the optimum costs.

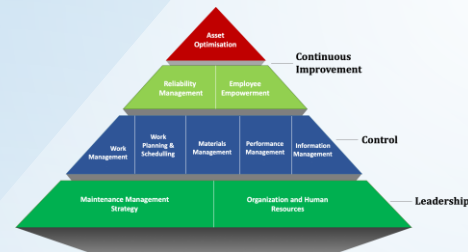

Our proven Maintenance Excellence Framework addresses each of the critical elements for an organisation to achieve "excellence" in its Maintenance Function. The elements of the Maintenance Excellence Framework make up the fundamental building blocks of maintenance leadership, control of maintenance activities, continuous improvement in maintenance and quantum leap. Each element describes the attributes which an organisation must have to achieve Maintenance Excellence.

OBJECTIVE
